OVERVIEW: Blackboard has three mobile apps with different uses and capabilities.

- **Blackboard**: This app is specifically for students to access their courses content, announcements, and grades.
- **Blackboard Instructor**: This app is specifically for instructors to post quick announcements and review content.
- **Collaborate**: You can join Collaborate Ultra on your mobile by going to Collaborate (or clicking on a link on your device) within your course in the Blackboard or Blackboard Instructor app. However, for best quality make sure you are on an excellent WiFi connection or use a computer.

While CityU supports the use of Blackboard’s mobile apps by students and faculty, please be aware that these tools have limitations. For student and instructor activity of a critical nature – submitting an assignment, writing discussion forum posts, and participating in collaborative activities in Blackboard or Collaborate - CityU highly recommends that students and faculty continue to utilize a computer with Chrome or Firefox internet browser and a reliable internet connection.

HOW TO GET STARTED WITH BLACKBOARD’S MOBILE APPS:

1. Visit the App Store or Google Play on your device to search for and download any or all of the apps listed above.

2. After installation, search for your institution by entering City University of Seattle. Select Web Login.
3. Use your **full email address** and then your password to login on CityU’s login page.
